Infinicraft

Unlimited credits, forever

Build anything.

Describe your idea in plain language and Infinicraft builds the site, app, or program for you. No credit counter, no meters, no limits.

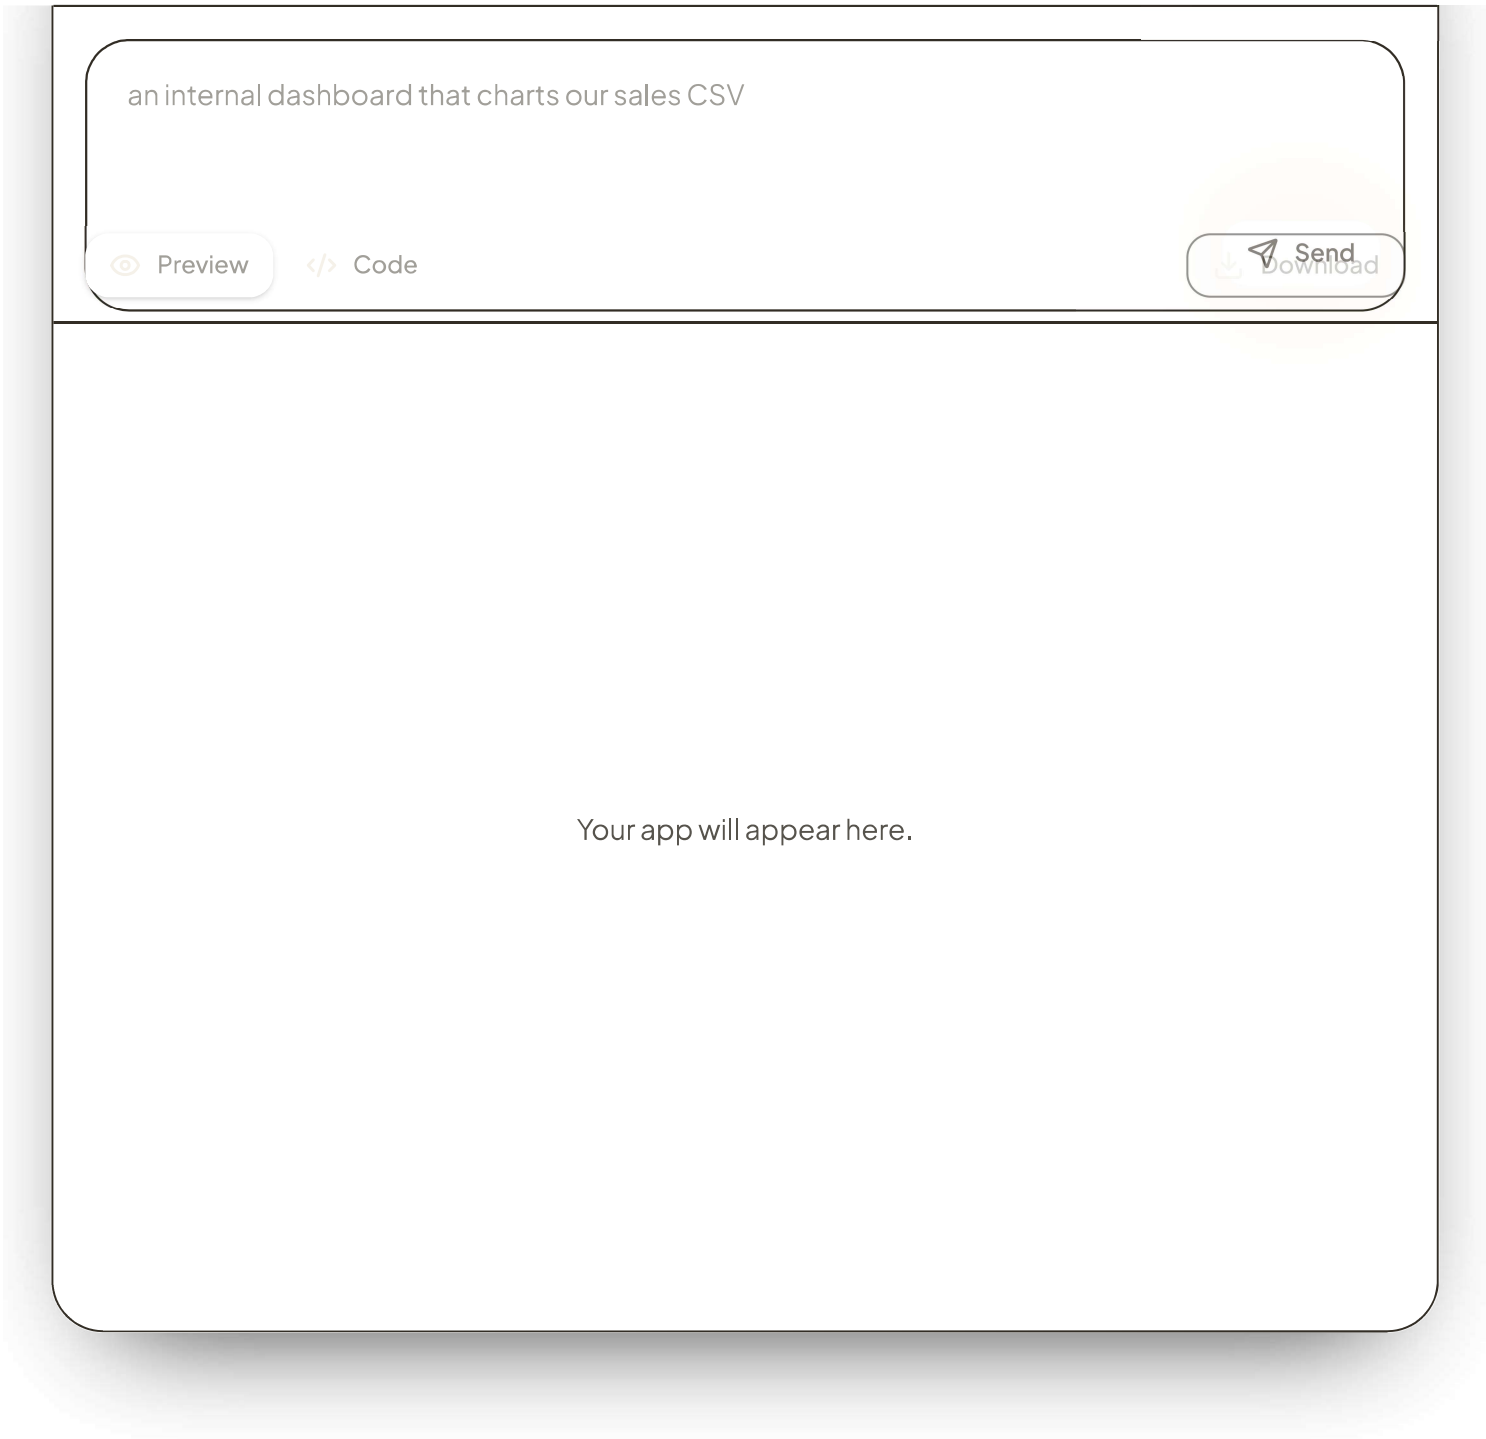
Describe what you want. Keep chatting to refine it — the AI remembers the whole conversation and your app.
a booking site for my barbershop with online payments
an internal dashboard that charts our sales CSV
a habit tracker with streaks and a calendar heatmap
a multiplayer-style trivia game with a live leaderboard
Payment Required
Edit with Lovable



Everything a builder needs, nothing metered

Edit with Lovable

Prompt to product

Type what you want. Get a working, editable codebase in seconds — not a mockup.

Backend included

Auth, database, storage and server functions wired up without leaving the chat.

Real code, yours

Clean React + TypeScript you can read, edit inline, or export to your own repo.

Publish instantly

One click to a live URL, custom domain optional. Redeploy as often as you like.

Programs too

Scripts, automations and CLI tools — not just websites.

Infinite credits

Iterate a thousand times on one screen. The counter never moves, because there isn't one.

One plan. No meter.

INFINITE

- Unlimited prompts and iterations
- Unlimited projects and collaborators

Edit with Lovable

- Backend, hosting and custom domains
- Export your code anytime
